# DISCOVERY SERVICES

DTI™

World-Class Service. Local Commitment.

DISCOVERY SERVICES

DTI offers the strength and resources of one of the largest Independent providers of end-to-end litigation support solutions – with the personal and local commitment of production offices in major markets across the U.S.

Through our sophisticated National Technology Centers in Atlanta and Seattle, combined with 27 local offices across the U.S., DTI provides an extensive suite of solutions integrating professional services, workflow and technology to meet our clients' most demanding e-discovery needs.

END TO END SERVICES INCLUDE:

- DATA PRESERVATION AND ACQUISITION
- E-DISCOVERY PROCESSING
- PAPER-BASED DISCOVERY
- EARLY CASE ASSESSMENT
- MANAGED DOCUMENT REVIEW
- TECHNOLOGY ASSISTED REVIEW
- BEST-OF-BREED REVIEW TOOLS

Leading law firms and corporate legal departments nationwide depend on DTI for custom, comprehensive solutions to their most complex discovery challenges. We leverage a unique collection of best-of-breed tools and technologies with the expertise of skilled industry veterans to ensure the right solution is employed for each project, every step of the way. DTI delivers high-quality and defensible solutions that enable law firms and corporations to significantly reduce their costs.

Each project is assigned a project manager who is responsible for creating an efficient workflow for the case team, keeping the project on schedule and budget, and providing frequent client communication of project status.

DTI continually researches the newest advancements in discovery technology and partners with leaders in the development of cutting edge tools to ensure our clients have access to the best, most appropriate solutions for each unique project.

DATA PRESERVATION AND ACQUISITION

Many discovery projects begin with the need to forensically preserve and collect data. DTI's certified forensics examiners follow our proven five-step methodical approach to the collection of data in a sound and defensible manner.

From forensic imaging and data recovery to documentation and chain of custody certification, every part of DTI's process is founded on proven, trial-accepted and defensible techniques. We ensure the integrity of the investigation, avoiding shortcuts and employing only field-tested methodologies.

EARLY CASE ASSESSMENT

Regulatory, compliance and litigation matters today routinely include data collections once unimaginable in size and scope. The earlier these collections can be pared to a manageable size, the more time and money will be saved on processing and review. DTI's best-of-breed suite of technologies includes the industries premier tools for data culling. We use the latest advancements available to significantly reduce collections – without eliminating any potentially relevant data.

BEST-OF-BREED REVIEW TOOLS

DTI provides a comprehensive suite of best-of-breed hosted data review and repository solutions. These scalable, easy-to-use applications provide for the review of meta-data, full text, TIFF images and native files, and meet SOC 2 security compliance standards. DTI partners with leading providers of document review technology to offer innovative content analysis and e-discovery software that allows teams to quickly identify, review, and categorize relevant information from large document collections.

E-DISCOVERY PROCESSING

At DTI's National Technology Centers and local offices, our experienced litigation support professionals and senior technologists focus on the delivery of sophisticated solutions to customers throughout the U.S. DTI employs a common platform across all locations, cutting edge tools and our proven, proprietary processes to perform superior e-discovery processing.

PAPER-BASED DISCOVERY

End-to-end solutions means DTI has not abandoned the traditional litigation support services still required in many large, complex and sensitive matters today. Because paper remains a very important element of every matter, DTI continues to dedicate substantial resources to the critical task of meeting paper management needs.

MANAGED DOCUMENT REVIEW

DTI offers legal staffing and attorneys for document review projects on-site and within its own secure network of review centers that are strategically located across the United States. Services included in managed document review include litigation review, antitrust review (HSR Second Requests) and records remediation.

TECHNOLOGY ASSISTED REVIEW

DTI supports several technology assisted review workflows that, when used properly, significantly reduce review time and cost while simultaneously improving quality. Obtain the best results by working with DTI's skilled and experienced professionals who understand how to strategically apply these tools to the specific needs of your case.
